## **Guidelines For Risk Based Process**

Guidelines for Risk Based Process Safety provides guidelines for industries that manufacture, consume, or handle chemicals, by focusing on new ways to design, correct, or improve process safety management practices. This new framework for thinking about process safety builds upon the original process safety management ideas published in the early 1990s, integrates industry lessons learned over the intervening years, utilizes applicable "total quality" principles (i.e., plan, do, check, act ...

...

A risk-based approach reduces the potential for assigning an undue amount of resources to managing lower-risk activities, thereby freeing up resources for tasks that address higher-risk activities. These Guidelines offer two central strategies for how companies can succeed in applying their management system:

### **Risk Based Process Safety - AIChE**

A systematic, risk-based approach to safety design can help eliminate hazards that pose intolerable risk from the process and mitigate the potential consequences of hazards. To achieve a consistent, effective approach to risk reduction, designers must be able to define “tolerable” and “intolerable” risks.
