Esthetics in periodontics and implantology. Periodontal plastic surgery comprises an increasing part of clinical periodontology. Clinical trials have traditionally used professionals to judge esthetic outcome, and few studies have addressed patient needs and requests (true end points).

Esthetics in periodontics and implantology

Dental implants are used to replace teeth after tooth loss. The dentist inserts a small titanium screw into the jaw at the site of the missing tooth, which serves as the support for a crown. These implants are almost indistinguishable from the surrounding natural teeth, and once the bone and supporting tissue fuse to the implant, they are ...
