Restraint & Handling for Veterinary Technicians ...

We were taught how to use several types of muzzles, nylon, gauze, leashes, our hands, and physical force for restraint techniques like the head lock, scruff hold (yes even for little dogs), and lateral recumbency with people laying on the dog to hold them still. For cats we received even less information.

Low Stress Handling® - From the Veterinary Technicians ...

Restraint Considerations • Restraint - hold back, check, or suppress an action and keep something under control using safety and some means of physical, chemical, or psychological action • Used by veterinary staff to allow an animal to be controlled for procedures - Safety of animal and of the people © 2011 Cengage Learning.

Basic Veterinary Restraint and Handling Procedures

8 Handling and Restraint Leashes are also made of rope, nylon, chain, or leather, with clips to attach directly to a collar. Leather leashes tend to be quite expensive and are rarely used in veterinary practice. Leashes come in many thicknesses and lengths. Always use thicker leashes on large dogs. A thinner leash may break if a large dog pulls against it.
